

UMESH CHANDRA P V

DevOps Engineer | Site Reliability Engineer (SRE) | AI Platform Engineer

Hyderabad, India | +91 9440039684 / 9381046418 | pathapatiumesh2024@gmail.com

PROFESSIONAL SUMMARY

DevOps / SRE and AI Platform Engineer with 6+ years in Kubernetes, Helm, Ansible, Docker, AWS, Azure, GCP, CI/CD, and observability. Reduced manual toil 60%, cut cloud costs 25%, achieved 95% deployment success, and improved MTTR using Grafana, Splunk, SLOs, and high-availability platforms supporting 400+ data science engineers.

CORE TECHNICAL SKILLS

Cloud: AWS (Lambda, S3), Microsoft Azure, Google Cloud Platform (GCP), multi-cloud, serverless, cloud cost optimization

Containers: Kubernetes, Helm, Docker

IaC / Automation: Ansible, AWX, Infrastructure as Code (IaC), CI/CD, GitHub, Linux

Observability / SRE: Grafana, Splunk, SLOs, SLIs, error budgets, incident response, MTTR, ServiceNow, alerting

Languages / AI Ops: Python, FastAPI, REST APIs, MongoDB, PySpark, Anaconda, AI/ML platform operations

PROFESSIONAL EXPERIENCE

Specialist - Architecture (Automation & Platforms)

03/2025 - Present

LTIMindtree | Hyderabad, India | Banking & Financial Services (Americas)

- Stabilized Kubernetes platform reliability for 400+ data science engineers, increasing service continuity 20%.
- Led Anaconda v5 upgrade and Kubernetes Helm deployments, improving scalability and deployment frequency for AI/ML workloads.
- Built 5 Grafana dashboards and Splunk real-time alerts, reducing incident response time and reinforcing SLO/error-budget practices.
- Enabled PySpark workflows and high availability, improving engineering throughput 15%.

Technical Lead - CIS Automation Tools & Platforms

08/2022 - 02/2025

Cognizant | Bangalore, India

- Deployed Grafana Enterprise across AWS, Azure, and GCP, reducing operational costs 20% and increasing dashboard adoption 15%.
- Cut incident response / MTTR 30% by integrating Grafana with tooling and ServiceNow workflows.
- Automated multi-cloud resource management, reducing troubleshooting time 30% and cloud costs 25%.
- Developed FastAPI services and mentored engineers, improving API response time 40% and productivity 20%.

Software Developer - Automation & Platforms

10/2019 - 06/2022

Microland Ltd | Bangalore, India

- Optimized Ansible and AWX automation to reduce manual toil 60% and improve system stability 50%.
- Integrated Microbots with ServiceNow using Python REST APIs, improving incident resolution efficiency 40%.
- Automated incident reassignment and MongoDB entry with Python, saving 3 hours daily.
- Automated Linux/Windows service restarts with Ansible, reducing downtime 30%.

KEY ACHIEVEMENTS

- Customer Delight Award — approximately 30% project cost savings through automation.
- Security/Deployment Automation — 95% deployment success rate.
- Cross-team Leadership — improved project success rate 25%.

EDUCATION

Bachelor of Technology (B.Tech), Electrical and Electronics Engineering — Mohan Babu University | 07/2016 - 04/2019
