CORE SKILLS

Cloud

AWS (Lambda, S3), Azure, GCP,
multi-cloud, serverless, cost
optimization

Containers / Orchestration

Kubernetes, Helm, Docker, platform
reliability

IaC / Automation

Ansible, AWX, Infrastructure as Code,
CI/CD, GitHub, Linux

Observability / SRE

Grafana, Splunk, SLOs/SLIs, error
budgets, alerting, MTTR, ServiceNow

Languages / Data / AI Ops

Python, FastAPI, REST APIs,
MongoDB, PySpark, Anaconda, AI/ML
platforms

EDUCATION

B.Tech — EEE

Mohan Babu University
07/2016 – 04/2019

AWARDS

Customer Delight Award

~30% project cost savings via
automation

Deployment Excellence

95% deployment success rate

Leadership Impact

+25% project success via cross-team
delivery

UMESH CHANDRA P V

DevOps Engineer · Site Reliability Engineer (SRE) · AI Platform Engineer

PROFESSIONAL SUMMARY

DevOps / SRE and AI Platform Engineer with 6+ years delivering Kubernetes, Helm, Ansible, and multi-cloud automation (AWS, Azure, GCP). Cut manual toil ~60%, reduced cloud cost ~25%, and hit 95% deployment success while improving MTTR with Grafana/Splunk observability, SLO-aligned alerting, and high-availability platforms for 400+ data science engineers.

PROFESSIONAL EXPERIENCE

Specialist – Architecture (Automation & Platforms)

03/2025 – Present

LTIMindtree · Hyderabad · Banking & Financial Services (Americas)

- Stabilized Kubernetes/AI platform reliability for 400+ global data science engineers, increasing service continuity ~20%.
- Led Anaconda v5 upgrade and Helm-based Kubernetes rollouts, raising scalability and deployment frequency for ML workloads.
- Built 5 Grafana dashboards + Splunk real-time alerts to cut incident response time and reinforce SLO/error-budget awareness.
- Unblocked PySpark/AI platform workflows, improving engineering throughput ~15% and sustaining high availability.

Technical Lead – CIS Automation Tools & Platforms

08/2022 – 02/2025

Cognizant · Bangalore · Retail Client (Multi-cloud)

- Deployed Grafana Enterprise observability across AWS/Azure/GCP, cutting ops cost ~20% and lifting dashboard adoption ~15%.
- Reduced MTTR ~30% by integrating Grafana alerts with existing tooling and ServiceNow incident workflows.
- Automated multi-cloud resource management via cloud-agnostic dashboards, cutting troubleshooting ~30% and cloud spend ~25%.
- Shipped FastAPI services and mentored engineers, improving API response ~40% and team productivity ~20%.

Software Developer – Automation & Platforms

10/2019 – 06/2022

Microland Ltd · Bangalore

- Optimized Ansible/AWX playbooks to eliminate ~60% manual toil and improve system stability ~50% across Linux/Windows fleets.
- Integrated Microbots with ServiceNow via Python REST APIs, accelerating incident resolution efficiency ~40%.
- Automated incident reassignment + MongoDB updates in Python, saving ~3 hrs/day of repetitive operational work.
- Automated Linux/Windows service restarts with Ansible, reducing related downtime ~30% and improving reliability.
